IEOR160 and IEOR162 Clarification

Starting Fall 2015, we will be reallocating some topics between IEOR160 and IEOR162 to eliminate duplication:

- IEOR160 will contain nonlinear programming (as it always has) and integer programming (which has sometimes been part of IEOR162 in the past).
- IEOR162 will feature linear programming (as it always has) and graphs and network flows (which have sometimes been in IEOR160 in the past)

For the next academic year (2015-2016):

- IEOR162 will be taught in both fall and spring
- IEOR160 will be taught **ONLY** in fall.
- Professor Hochbaum will teach IEOR162 and Professor Lavaei will teach IEOR160.
